

HugeBond Universal FliPro

8th generation, one component self-etch light cure dental adhesive

► Universal Application

- Suitable for various substrates
- Compatible with total-etch, self-etch and selective-etch
- Works with light-cure, self-cure and dual cure cements
- Contains **MDP monomer**, delivering self-etching properties and higher bonding strength

► Reliable Bonding

- Bonding strength no lower than 20 MPa
- Low film thickness of 3µm
- Effectively seals over 90% dentin tubules
- Ultra-mild pH(pH=2.7)

► Gentle Experience

- Virtually no postoperative sensitivity
- Low occurrence of microleakage prevents secondary caries
- High moisture tolerance offers consistent high bonding strength on dry and moist dentin

Upgraded flip-open cap
Single-hand operation

5ML → 6ML

Versatile, Simple, Efficient...

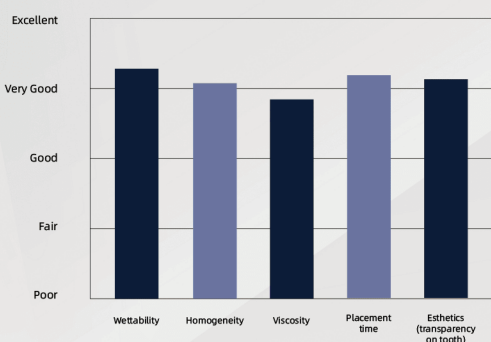

- The latest innovation, **8th generation** adhesive.
- One-bottle technique, streamlines the workflow in practice.
- Featuring universality and versatility, compatible with multiple substrates in restorations.
- Plays a core role in clinical restorative solutions:
 - TopCEM Indirect Restorative Solution
 - TrusFIL Direct Restorative Solution
 - TopCEM Veneer Esthetics Solution

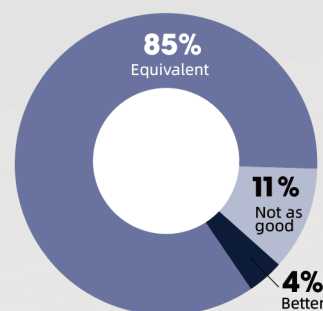

"EASY TO USE
WITH MANY
INDICATIONS."
