Manufactured by **MedPark**

**CORTICAL & CANCELLOUS BONE**

### Donor Management According to The US GTP

Completed approval by the MFDS, Thorough donor management at the level of The US GTP, verification of tissue safety and securing effectiveness

### Own Manufacturing·Production System

Establishment of our own manufacturing system with our own production facilities

### Possession of Various types of Products

Customized product supply system with various ratios to meet customer needs

### Excellent New Bone Formation Rate

Promoting osteoblast adhesion and new bone formation by maximizing osteoinduction and osteoconduction effects

### User-Friendliness

Optimized for user convenience with a curved syringe suitable for indication

## Indication

Sinus lift	Horizontal augmentation	Extraction socket
GBR	Periodontal defect	Peri implant defect

## Product Info

Human Tissue

Sterilized product

Single use

Source	Content	Type	Particle size	Weight (Volume)
Allograft (FDDBA)	Cortical 70% Cancellous 30%	Syringe	0.25 ~ 1.0 mm	0.25 cc
				0.5 cc
				1.0 cc
